Key Takeaways, Session 13, The Role of the CNA

- There are many holiday seasons throughout the year. It is important to respect and value each person's holiday goals and preferences. <https://www.cdc.gov/coronavirus/2019-ncov/daily-life-coping/holidays.html>
- Visitation policies should be specific and detailed, including any limitations related to number of visitors, visitors from out of state, visitors with any possible signs/symptoms of COVID-19, indoor visit location/s and points of entry and exit, use of masks or full PPE, social distancing, hand hygiene, testing requirements.
- Many residents may ask about going out with family/friends over particular holidays and whether or not they may attend family gatherings with up to 10 people or more. Consult your state department of public health for updated state-specific guidance on this topic, as well as current CDC and CMS recommendations.
